REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention. Specifically, the closest prior art of record, U.S. Patent 5,624,428 to Sauer, fails to disclose a stretchable fastening member having a first stretchable zone and a second stretchable zone, wherein the extensibility of the second zone is restricted by restriction means that are inactivated upon a further applied extension force after the first zone has been extended by an initially applied extension force. As noted in the Appeal Brief filed 3 October 2006, the stretchable fastening member of Sauer does not comprise a first stretchable zone that is extended by an initially applied extension force, but rather a single stretchable zone that is only extendable after the restriction means is released. The additional prior art of record, U.S. Patent 5,662,638 and U.S. Patent Application Publications 2002/0099352 and 2004/0236301 disclose fastening members that must be unfolded to release the restriction means and therefore do not comprise a first stretchable zone. The fastening member having both first and second stretchable zones of the claimed invention allows for the second stretchable zone to reduce stress on the fastening member, as described on page 3 of the present specification. Therefore, the prior art of record does not teach or fairly suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
